

## **Jovan Miladinović**

Mr. Jovan Miladinović having over 20 years of IT experience in roles ranging from technical leadership to management, combined with a strong understanding of business process provides him with a vision required to successfully lead Scienton, a company focused on information risk and security modeling. Since his appointment as President and Chief Executive Officer of Scienton in November 2000, Mr. Miladinović has accelerated Scienton's growth and extended the company's leadership through a strategic focus on modeling of the Information Security space.

Mr. Miladinović has driven key infrastructure and application projects in communications, database and distributed processing for Fortune 1000 clients and other organizations including Montreal Exchange, CGI Group, Mydland Walwyn, Canadian Standards Association, SHL System House, GE Capital, Canadian Department of National Defence, Bombardier/DeHavilland, Star Data Systems, William M. Mercer and many others.

Mr Miladinović (one of the first 100 ISO17799 certified practitioners in the world) has been recognized as one of the North American pioneers and principal proponents of the new Corporate Governance paradigm that insists on sustainability rather than short term gains, a paradigm that relies on scientific approach to managing risks and other business uncertainties. Guided by the findings of the capable and recognized Scienton research team, Mr Miladinović regularly speaks and writes at numerous North American risk and corporate governance forums.
