

Predrag Živić

Mr. Predrag Živić, one of the founders and Chief Operating Officer for Scienton Technologies, has the responsibility for defining the strategy, direction and management of Scienton's development and service delivery.

Mr. Živić's leadership and corporate technology vision enabled Scienton to work closely with its clients to implement information risk and security management solutions using the Information Security Model™. Before Scienton, Mr. Živić provided management and technical leadership as National Internet Business Solutions Group Manager for GE Capital and Internet and Security Practice Director for Platinum Technologies providing leading risk and security management system solutions to numerous Fortune 1000 clients.

As Canada's ISO17799 User Group president (one of the first 100 ISO17799 certified practitioners in the world), Mr. Živić uses standard's holistic business process approach as a baseline for Scienton Information Security Model™ to manage and calculate the risk to properly serve corporate governance and to implement effective security management systems.

Scienton's work and research in the area of risk and corporate governance led to invitation for presentations at the numerous conferences and seminars in Europe and North America for Mr. Živić, like CIO SUMMIT, Managing IT Security Risk conference, the first world congress on risk, EICAR 2003 conference, SANS 2000 annual conference, ISSA and ISACA seminars, and many others.
